

TSK

Powder Solutions

Engineering
& Construction

Integrated Solution Provider

Established in 1979, from a local steel fabrication workshop to a turn-key engineering and construction company, TSK has transformed into an integrated solutions provider with comprehensive services focusing on providing innovative and sustainable technologies.

From Sustainable Food to Advanced Material

We are an engineering and construction company that represent the best technologies and equipment in Powder Engineering. With our partner's, POITTEMILL and PRECI, cutting-edge technologies and TSK's expertise in project engineering and construction, we can support you from laboratory to large industrial scale production.

Our Technical Centers & Laboratories in France, Japan and Thailand are available for product testing and development. From sustainable food to advanced materials, our POWDER SOLUTIONS are tailor-made to your specific requirement.

Engineering & Construction

Turn-key Solutions

—
Design / Fabrication / Installation

With over 4 decades of experienced in mechanical, electrical, civil engineering, and construction projects, our portfolio includes machinery, equipment and plants in a wide range of industries. We can supply from a single machine to complete turn-key project.

ENGINEERING

Pre-project Support
Process Design
Equipment Design
Structural Design

STORAGE

Silo
Tank
Vessel

STEEL FABRICATION

Steel Structure
Platform
Equipment Manufacturing
Custom Design

MATERIAL HANDLING

Bulk / Liquid Handling System
Intake / Dosing / Feeding System
Conveying System

UTILITY AND PIPING

Process / Utility Piping
Sprouting / Aspiration
Fire Protection

CONSTRUCTION

Factory / Warehouse
Machine Foundation
Design and permits

MIXING

Mixing Tank
Mixing / Weighing Systems

ELECTRICAL AND AUTOMATION

Electrical Control and Wiring
Automation and Programming

SERVICES

Installation and Commissioning
Maintenance and Aftersale Service

Powder Solutions

Partnered with leading edge engineering and equipment companies specialized in powder engineering.

Fine Grinding &
Classifying Technologies
Plant-based Protein Solutions

POITTEMILL GROUP is an engineering companies specializing in providing fine-grinding solutions, powder processing and preparation from laboratory to industrial scale. As we design and install our own equipment, we have been able to provide installations for more than 100 years that are tailor-made to customer requirements.

A family-owned equipment and engineering company acting for powder and flour valorization and mechanical processing. Providing milling, drying and classifying innovative solutions & technologies.

POITTEMILL GROUP's mission is to develop innovative and reliable processes for more qualitative and environmentally friendly products.

100+ Years of experience	7000+ Instllation world wide	125+ Countries	80 % Export market

Biotechnology
High precision-cleaning process

PRECI is a hybrid process engineering company possessing a range of different cutting-edge technologies. The primary scope of business is powder technology, biotechnology, and high-precision cleaning processes.

Focusing on spray dryers, spray coolers, and freeze granulator PRECI's powder technology team is active in a wide range of industry sectors, from pharmaceuticals and foodstuffs, through leading-edge materials in metals and fine ceramics, to organic chemicals.

Our strength is that we can customize the design of almost all of our products to meet the client's specific requirement. From research to production scale processes, we offer a detailed consultation to provide processes that satisfy our customers.
